THE ART OF CRAFTSMANSHIP

ABOUT KEYSTONE

Since 1972, Keystone Wood Specialties has grown from a one-man cabinet shop to the wholesale manufacturer of wood components it is today. Our focus is providing top-quality high-end components to the custom cabinet, furniture, and remodeling industries.

We offer an array of products, including doors and drawer fronts, dovetailed drawer boxes, face frames, moulding, valances, wainscoting, turnings and corbels, radius doors, plywood and veneer, finishing options, and more.

When you call Keystone, you will always be greeted by a live, knowledgeable customer service professional. Whether you have a question about our products, need assistance placing an order, or need to discuss an existing order, our staff is here to ensure that you and your customers are completely satisfied.

From rough lumber in a wide variety of wood species to a fully equipped finishing department, Keystone has everything you need to complete your custom project. Whether you want one door or one thousand doors, you can choose from a wide selection of designs or create one of your own. We pride ourselves on one-of-a-kind custom orders.

WHAT IS REFACING?

AN AFFORDABLE ALTERNATIVE

Refacing offers an affordable alternative to the complete kitchen remodel while still giving your customer the kitchen of their dreams. With refacing, you have many options, from small but powerful upgrades to completely changing the look, functionality, and feel of a kitchen—all while keeping the existing cabinets and layout.

WHEN TO REFACE

There are three main considerations when deciding whether to reface versus replace. If the kitchen meets these three criteria, refacing could be a great option:

1. The general layout is desirable (with only minor changes needed).
2. Structurally sound wood cabinets with wood face frames are in reasonably good condition.
3. The cabinets are in a controlled environment (not in a damp basement or garage).

OPTIONS

Refacing gives you and your customers the ability to choose different levels of renovation:

- Redoor Only: Keep the existing cabinet color and just upgrade to a new door design. Keystone can match the paint or stain of the existing cabinets. With this option, you could also add or upgrade crown moulding. See our Doors & Drawer Fronts and Moulding, Turnings & More catalogs for design options.
- Full Exterior: Completely change the look of the cabinets while keeping the existing layout and functionality. See pages 4–5 of this catalog.
- Interior: Upgrade the function and feel of the kitchen with new drawers, slides, and interior features such as cutlery trays. See pages 6–7 of this catalog.
- Pull-Out Shelves: Add pull-out shelves to any base or pantry cabinet. This can be done as part of a larger refacing job or as a stand-alone option. See pages 8–9 of this catalog.

Keep reading to see how Keystone Wood Specialties can help you provide an affordable alternative to the full kitchen remodel. Our custom sizes, finishes, and styles ensure you can meet your customer's highest expectations for a wide variety of kitchens. From materials, to supplies, to training, let Keystone be your one-stop shop, supplying everything you need for refacing.

Changing the look of a kitchen can be simple and affordable.

EXTERIOR OPTIONS

REPLACE DOORS & MOULDING

Update to a new door design and upgrade the door hardware and moulding. For redoor only (without resurfacing the cabinets), have your items finished to match the existing color.

DOORS & DRAWER FRONTS

Keystone offers a wide selection of door designs, custom sizes, and boring for hinges. We also stock BLUM soft-close hinges.

MOULDING

We have moulding for any refacing need, including light rail and outside corners. See our Moulding, Turnings & More catalog for stacked moulding, period suggestions, and full-scale profiles.

RESURFACE CABINETS

Resurface the existing cabinets with the color of your choice. Plywood can be used as cabinet ends, soffit, and fascia. Veneer can be used for the cabinet faces and ends.

VENEER & PLYWOOD

Wood veneer and plywood in any wood species or phenolic veneer as a paintable option. See page 10 for more information.

FINISHES

Choose from a large selection of paints, stains, and glazes, shown in our Finishes catalog on recommended wood species. We also match any custom paint color or stain—just send us a stain sample or paint chip.

ADD OR UPDATE FEATURES

Create a new look by adding accent features such as turnings, columns, or bun feet. While not always necessary, the homeowner may also wish to update countertops, backsplashes, and lighting.

TURNINGS & MORE

See our Moulding, Turnings & More catalog for a full selection of columns, turnings, and bun feet.

*Change the function and
feel of a kitchen's interior.*

INTERIOR OPTIONS

REPLACE DRAWERS

If existing drawers are in poor condition, replace them with dovetailed drawer boxes. Take this opportunity to upgrade to soft-close, full-extension slides to increase the usable spaces in each drawer.

DRAWERS & SLIDES

Keystone's soft maple drawer boxes feature one-piece sides up to 8" high and a chamfered top edge. See our Drawer Boxes catalog for more box details and drawer slide options. Laser engraving available.

INCREASE FUNCTIONALITY

Cutlery trays and inserts for wine, spices, and more can be made to fit new or existing drawers. In place of a standard drawer, add a peg board drawer or double cutlery drawer for increased functionality.

SPECIALTY BOXES & INSERTS

Boxes and inserts can be customized to suit the needs of your customer. For instance, add a knife block insert to the bottom level of a double cutlery tray. See our Drawer Boxes catalog for more cutlery tray options, divider drawers, trash bin pull-outs, and more.

ADD CABINETS

Add a custom-size cabinet where an appliance or soffit was removed, or if you have one or two cabinets that are in poor condition and not suitable to reface.

RTA CABINETS

Keystone offers ready-to-assemble (RTA) cabinets in any size, wood species, and finish to fit your application. See page 11 for more information.

*Change the
hard-to-reach
places into
usable space.*

PULL-OUT SHELVES

By adding pull-out shelves, you can maximize the usable space of any base or pantry cabinet. This can be done as part of a larger refacing job or as a stand-alone option.

X-SERIES BRACKET SYSTEM

Solid wood. Simple design. Easily adjustable. Keystone offers pilasters in various sizes and any wood species, or you can order lengths to cut to size on the job as you need them. The brackets attach to almost any type of drawer slide and make it easy to adjust the drawer placement after installation.

PULL-OUT DRAWERS

Order drawers as pull-outs with the option of a handle cutout or side profile.

U-DRAWERS

Add two U-drawers as pull-outs in a sink base. Custom dimensions to fit around any existing plumbing are available.

PAN PULL-OUTS

Add a pan pull-out along with a smaller pull-out drawer to any base.

SHEET GOODS

Plywood and veneer are available finished or unfinished. All veneers are available with or without pressure-sensitive adhesive (PSA). Veneer is stocked in 24" x 96" sheets (36" available upon request) and can be slit to custom widths.

PAINTABLE PHENOLIC VENEER

Paintable phenolic is an excellent option if you are looking for a thin, flexible, easy-to-cut product that will not crack.

- Easier to cut than wood veneer.
- Painted surface is smooth and uniform.
- Cut strips in any direction to optimize yield.
- Light-colored core is easy to touch up.
- Approximately 15 Mil thick.

WOOD VENEER

Real wood veneers are permanently bonded under heat and pressure to resin-saturated backer sheet. This backer allows flexibility and acts as a barrier to prevent adhesives and finishes from penetrating.

- 10 Mil available with stain only. (Maple only available in 20 Mil or 30 Mil.)
- 30 Mil available with any finish.

WOOD OVER WOOD VENEER (WOW)

WOW has a cross-grain wood backer that minimizes wood veneer's tendency to expand and contract across the grain.

- Wood backer prevents telegraphing.
- Resistant to ridging and bubbling.
- Available with stain only.
- Available in limited wood species—see website.
- Approximately 35 Mil thick.

WOOD POLYBAK VENEER

Wood polybak is genuine wood veneer that has a backer impregnated with polymer resin.

- Offers excellent moisture resistance.
- Does not dry out and become brittle.
- Resists damage from handling.
- No added formaldehyde.
- Backer has been rated Class A for flame spread.
- Approximately 40 Mil thick.

Choice of wood species available for both veneer and plywood.

PLYWOOD

Hardwood veneers are bonded either to an all-veneer core or to a medium-density fiberboard (MDF) core. The MDF core provides a flat, stable surface suitable for paints and stains.

- Standard-size sheets (24" x 96" or 48" x 96") or cut to any size.
- 1/4" plywood available in most popular wood species (unless otherwise specified, MDF core is used).
- 1/8" plywood available in maple, cherry, red oak, and white birch (veneer core only).
- MDF core is recommended for all finishes.
- Veneer core is recommended for stain only.

RTA CABINETS

READY-TO-ASSEMBLE

Combining Keystone's high-end cabinet components with the revolutionary Cabinotch® Cabinet Box System yields the best RTA cabinets available today.

- Features a wood-to-wood locking glue joint.
- Assembles in minutes without tools, clamps, or fasteners. (Cabinet back must be glued and nailed.)
- The assembled cabinet boxes are strong, square, and true.
- Height, width, and depth are available in .001" increments.
- Made from PureBond® plywood from Columbia Forest Products.
- Available with 1/2" or 3/4" sides.
- Formaldehyde-free and CARB P2 compliant.
- Available in nine wood species.

Keystone offers a limited selection of RTA cabinets intended for refacing projects. For larger quantities (e.g., entire kitchens), visit the Cabinotch website: cabinotch.us.

BC BASE CABINET

This is a full-height base cabinet with no drawers. Available with adjustable shelves.

BCD1 BASE CABINET 1 DRAWER

This is a base cabinet with one 5" standard-height drawer opening (specify height if different). Available with one adjustable shelf.

UC UPPER CABINET

This is an upper cabinet. Available with up to six adjustable shelves.

T56 TALL CABINET FIXED LOWER 56"

This tall cabinet has a fixed lower opening of 56". Top opening is variable. Available with up to five adjustable shelves.

TOOLS & RESOURCES

FIBER SCRAPER

The “approved” application tool designed specifically for the hand application of flexible veneer sheets with pressure-sensitive adhesive (PSA).

VIRUTEX® LAMINATE SLITTER

This handheld laminate slitter can be used for cutting strips of flexible wood veneer or plastic laminates. You get a clean “factory” edge on every piece. Adjustable from 3/8” to 3 1/4”. Available with optional bench clamp (shown right).

SINGLE EDGE TRIMMER

Used to trim wood or laminate veneer after application. Spare blades are available.

VIRUTEX LAMINATE MITER CUTTER

This veneer cutter is useful for cutting strips of veneer to length on the job site. It gives a clean, precise cut every time by clamping the veneer and shearing it across the grain.

REFACING TRAINING

Keystone offers a one-day, hands-on refacing training at our facility in Lancaster, Pennsylvania. Call for availability.

- Proven standard industry methods for surface preparation and veneer application
- Options for corner treatment, end panels, and cabinet bottoms
- Best practices for applying crown moulding
- Touch-up techniques
- Solutions to common problem areas

REFACING SALES KIT

Sales aids are available individually or as a kit with a sturdy carrying case.

- Sample doors, drawers, moulding, veneer, and starter color chain
- Catalogs and color chart
- Sales presentation DVD
- Order forms for Keystone products
- Refacing brochures
